AUTM's Partnering Forum on Smart Power & Energy Storage Solutions

**Maximize marketing of your institution's technologies
and research strengths**

Don't miss this technology-focused business development meeting.

AUTM's Partnering Forum on smart power and energy storage solutions will be the ideal opportunity for technology transfer and licensing specialists from universities and research institutions to connect with their counterparts in business development and intellectual property from the energy sector.

AUTM's Partnering Forum on Smart Power & Energy Storage Solutions

Hosted by Case Western Reserve University

October 26-27, 2016

Tinkham Veale University Center at Case Western Reserve University
Cleveland, OH

Kick-off Evening Reception

October 26, 2016 • 6 p.m.

The meeting format will foster robust networking for exchanging licensing opportunities and mutual technology interests for consideration of potential business collaborations in the area of energy storage technology. University representatives may highlight their centers of excellence, sponsored research capabilities, and even student co-op opportunities.

The Partnering Forum on smart power and energy storage solutions will include panel discussions, a showcase to feature technologies of interest, and ample time to schedule one-on-one meetings.

Six reasons why you should not miss this groundbreaking event:

- The forum is devoted to identifying, creating, and nurturing relationships with business development professionals from companies in the energy storage industry in one day.
- This event is designed to result in generation of licensing leads.
- All of the key companies and institutions working in the field of energy storage have been invited and most are expected to participate.
- Technology transfer managers specializing in energy storage technologies will be attending in order to provide ample opportunity to exchange best practices and solve challenges.
- Attendees will list all of their marketable opportunities in a categorized program that will be available to each attendee prior to the conference.
- Register Online or Onsite
Early Bird Registration: \$295 before September 14, 2016!
