

Association of University Technology Managers®  
Advancing Discoveries for a Better World®

## Maximize your scouting of animal health and nutrition technologies by participating in the new AUTM Partnering Forum

Develop more productive business relationships with university technology transfer offices and increase your opportunities to license and advance available discoveries! The Association of University Technology Managers (AUTM) has launched a series of one-day Partnering Forums to bring together industry and academia in targeted technology sectors.

The partnering forum will foster a robust networking environment around a specific technology focus. The meetings will connect technology transfer and licensing professionals from universities and research institutions with their counterparts in business development and intellectual property from the featured industry. The **Partnering Forum on Animal Health and Nutrition Technologies** will include panel discussions, a showcase to feature technologies of interest, and ample time to schedule one-on-one meetings.

### AUTM Partnering Forum on Animal Health and Nutrition Technologies

*Hosted by Kansas State University and Auburn University*

**September 1 – 2, 2015**

Kansas City Marriott Downtown • Kansas City, MO

#### **Kick-off Evening Reception**

(Immediately following the Animal Health Investment Forum)

Held at Kansas City Marriott Downtown

Sept. 1 • 6:30 p.m.

To identify specific business opportunities for follow-up at the meeting, the institutional representatives will provide a categorized list of animal health and nutrition technologies available for licensing in advance of the meeting. At the meeting, each institution will have the opportunity to briefly spotlight their specific capabilities in animal health and nutrition and centers of innovation excellence sufficient for you to explore potential research collaborations.

#### **Why you should attend:**

- This event is exclusively devoted to identifying, creating, and nurturing of relationships with licensing professionals who manage animal health and nutrition technology portfolios at their respective institutions, enabling you to identify the right contacts for future collaboration development.
- The meeting location and schedule are designed to be cost-effective and efficient.
- This event is timed to coordinate with the KC Animal Health Corridor Events and following the Animal Health Investment Forum
- Key academic institutions working in the field of animal health and nutrition technologies are expected to participate.
- Let universities know exactly what you need and how you would like to receive information.
- The meeting is designed to encourage robust networking and ample time for one-on-one relationship development opportunities.
